

Dear Parents,

Your child will have the opportunity to participate in technology class at least once per week for 45 minutes. Our goal is to guide students on how to use technology as a tool for schoolwork, research, and lifelong learning.

Our curriculum consists of 4 units (multimedia, word processing, spreadsheets and introduction to coding). Students will complete at least 2 projects per unit. This year's theme is 'Developing Character'. Each unit will focus on a specific character trait that will help develop good character. This unit the focus will be on being a good listener. Students will learn about the new technology they will be using as well as how to be a good listener in the lab and at school. They will be learning new multimedia skills and completing a multi-slide presentation using these new techniques. Printed versions of their work will be sent home at the end of this unit with a learning objectives sheet showing the technology skills that were covered. We look forward to an exciting experience this year!

Sincerely,
Mrs. Castillo

Grade:

Kindergarten

Theme:

Developing Character:
Being a Good Listener in the Computer Lab

Computer Skills:

Primary – Presentation Design (Multimedia)
Secondary - Internet, Operating Systems, Hardware, Graphics

Software:

Multimedia Application - Google Slides
